THE FINAL WORD
24 // An Artful Teacher

Cover Image: The joined hands of OWU students and faculty—who were working on an OWU Connection research project—symbolize the creative power and global reach of Ohio Wesleyan connections. Working on the research project (described on page 7) and serving as hand models were, from left, zoology professor Dave Markwardt, Katelyn Nance '14, Ted Shipitalo '14, zooology professor Amy Downing, and Jonathan Overstreet '15.
What is Your OWU Connection?

Over the past five years, the Ohio Wesleyan faculty has worked tirelessly to enhance the curriculum with the development of The OWU Connection. At the most basic level, The OWU Connection challenges students to recognize and experience the inter-relatedness of knowledge across the disciplines, the complexity and nuance that characterize the challenges their generation will confront, and the connection between theoretical understanding of knowledge and practical application of the same knowledge in ways that enhance the quality of human life and enrich the human experience.

At another level, The OWU Connection is a metaphor for what makes Ohio Wesleyan distinctive and for why an OWU education matters. Today’s students will live and work in a world that requires the ability to make connections of all sorts. Their generation will be challenged to solve complex problems that require the ability to connect knowledge from a variety of disciplines, that in earlier times, might have seemed unrelated. They will live in a global society that requires the ability to make connections across diverse cultural boundaries, political structures, economic systems and social organizations. Imagine the complexity of confronting world hunger, climate change, sectarian violence, public health, and global poverty. These are enormous challenges that threaten the fabric of human society and the future of our planet. Understanding and solving these problems require the ability to make connections.

Connections happen at OWU every day. They happen pedagogically, in the structure of a curriculum that connects classroom learning with real-world experience, theory with practice, and a campus in central Ohio with study and travel around the world. Connections happen at a human level, as students work individually with faculty mentors and as they meet alumni who offer internships, externships, and settings for undergraduate research or volunteer service. They happen philanthropically, as loyal and generous alumni and friends provide resources to create opportunities for students to explore connections through travel-learning, course connection networks, and individual projects.

In this issue of the Magazine, we review ways in which students make connections every day. We also explore OWU Connections that extend beyond those of us who are on campus. Every person associated with Ohio Wesleyan has an OWU Connection. As you read the Magazine, I invite you to consider your own experience. What is your OWU Connection? How does OWU Connection serve as a metaphor for the impact Ohio Wesleyan has had on your life?

We are more connected than ever, and Ohio Wesleyan is leading the way in developing a 21st-century liberal arts education that emphasizes the connections that matter the most. Thank you for your abiding support, and for your OWU Connection.

Rock Jones
President of Ohio Wesleyan University
Well Connected
CURRICULUM LINKS STUDENTS WITH LIFE-CHANGING OPPORTUNITY

Alex Webb ’15, left, who studied myth and folklore this past spring with Anne Sokolsky, used her experience in two OWU Connection travel courses to help win a prestigious Boren Scholarship and a 7-month study program at National Taiwan University.
The word “connection” echoes in conversations across the Ohio Wesleyan campus. Students talk about Course Connections, connections with alumni, and connections with employers and grad schools. They’re connecting with cultures from around the world.

Faculty are connecting theory and practice, they’re connecting big ideas across disciplines, they’re connecting with students outside the classroom and lab.

“Connection” seems to be President Rock Jones’ favorite word these days. He uses it to describe life on the campus. And he uses it to define OWU’s unique curricular approach to the liberal arts.

“The OWU Connection engages students and faculty in shared intellectual experiences that enrich the Ohio Wesleyan curriculum through interdisciplinary course connections, the opportunity to connect theory to practice both in the classroom and in off-campus travel learning experiences, and in a wide variety of individual projects undertaken by students with important faculty support,” Jones says. “The OWU Connection embraces Ohio Wesleyan’s historic commitment to liberal education in ways that are fresh and relevant for students whose life work will be accomplished through the middle of the 21st century.”

Ohio Wesleyan’s faculty launched The OWU Connection in 2009, and it’s grown to become the foundation of Ohio Wesleyan’s unique approach to a liberal arts education. It’s not just an academic program; it’s the way OWU approaches higher education.

The OWU Connection combines curricular and co-curricular elements that both deepen traditional liberal arts learning and connect that learning to real issues graduates will face on the job and in society.

“The OWU Connection shows our commitment to helping students succeed in college, prepare for a career, and become a leader,” Jones says.

The goal: producing leaders who can understand complex problems, continually develop new skills, and work in diverse, global settings.

The expansive OWU Connection encompasses a number of curricular and co-curricular elements that shape the student experience from day one through graduation.
University Connections
The first component of The OWU Experience course—a first-semester OWU Experience course—aims to start students on the path to success and a rich OWU experience.

Provost Chuck Steinmetz ’84 says when new OWU students understand the resources and unique academic opportunities available to them, “it translates into students having greater academic success, stronger engagement in campus activities, and a clearer sense of their academic/career vector.”

The class begins with summer reading, which leads to lively discussion about the role of a liberal arts education in cultivating a rich and meaningful life (each class is limited to 16 students to promote discussion and one-on-one interaction). Students also learn about the wide array of services and academic opportunities OWU provides.

Results have been impressive. During each of the past two years, students enrolled in The OWU Experience were retained at a higher rate than students who did not take the course.

Course Connections
A second element of the program connects learning across disciplines. Through Course Connections, students study a topic (such as poverty, water, or the Silk Road) in greater breadth and depth by taking classes that approach the topic from social, political, philosophical, economic, scientific, artistic, and other perspectives.

“At their best, our Course Connections have been what the liberal arts is all about,” says Erin Flynn, associate professor of philosophy, who leads the Modern Society and Its Discontents Course Connection.

“We want students to be able to see and articulate the differences and understand the limitations of individual disciplinary approaches,” Flynn says. “My hope is that we’re complicating their lives, which is what we should be doing in undergraduate education.”

Jennifer Eltringham ’14, one of Flynn’s students, loves that complication and complexity. “You get to a deeper understanding if you do a Course Connection,” she says.

Global Connections
OWU offers a dozen Travel-Learning Courses a year, linking classroom learning with experiences to learn in settings around the world. In the past year, students have shot photography in the American Southwest, studied botany in Brazil, and applied mathematical models to study climate change in Alaska.

Anne Sokolsky, associate professor of humanities and instructor of a Travel-Learning Course exploring elegance and brutality in Japanese literature this spring, says Travel-Learning Courses have provided some of her most satisfying experiences in teaching. “We have a wonderful idea with these Travel-Learning Courses. They are not just ‘tours’ of a place. They are serious intellectual endeavors in which students and professors travel together to think deeply about an issue in a place beyond the confines of our classroom walls.”

In 2011, she took students to Japan as part of a course on the depiction of the Pacific War in literature and culture. “While we discussed these ideas in class, the students gained so much more in knowledge by experiencing first-hand the environment of Yasukuni Shrine, Hiroshima, Nagasaki, the military bases of Okinawa, and then Pearl Harbor.”

She says, “Traveling with students was amazing. I saw them in ways I never would be able to in a classroom setting. We were with each other 24-7. I was very impressed with their ability to be learned travelers rather than tourists. Even though they have all graduated now, I still keep in touch with them. Traveling with students for two weeks to study something so emotionally moving as the rhetoric of war and its aftermath on different groups of people was a deeply bonding experience.”

Alex Webb ’15, who Professor Sokolsky calls one of her “top-notch” students from this past spring, previously traveled to Taiwan in 2012 and mainland China in 2013 in classes taught by Ching-Hsuan Wu, Ph.D., assistant professor of modern foreign languages. She said, “Through these trips, I came to the realization that I was passionate about these two Mandarin-speaking nations.”

“In Taiwan, we explored the island, visiting different landmarks and important cultural and historical locations and touring Taipei extensively,” Webb said. “We also studied for two weeks at National Taiwan University’s International Chinese Language Program.”

With the background from her OWU
Connection courses, Webb this year received a $10,000 David L. Boren Award for International Study from the National Security Education Program. She’s using the award to return to National Taiwan University to study Mandarin Chinese from June through December.

Webb’s Boren Scholarship requires that she work in the federal government for at least one year, which aligns well with her career goals. After graduation, she hopes to pursue a career with the U.S. government, working as an intelligence community case officer, or similar, focused on Taiwan-China-U.S. relations.

**Theory-to-Practice Connections**

One of the most exciting features of The OWU Connection links traditional liberal arts learning with real-world experience. Through the Theory-to-Practice Grant Program, students develop proposals for projects (usually two or three weeks long) anywhere in the world where they can apply what they’ve learned in the classroom or lab. Grants are competitively awarded and typically cover the full cost of the project, including travel.

The program is funded by the generous support of the President’s Circle, a group of donors who have made special gifts to fund initiatives related to Ohio Wesleyan’s Strategic Plan.

Kelly Maier ’14 used her grant to study early childhood education in Finland. “In Finland, I took advantage of every opportunity we had to immerse ourselves in the culture. From the family dinner table to talking with the National Finnish Board of Education, I was constantly learning something new,” she says.

“After returning from Finland I can truly see the impact a culture can have upon an educational system.”

When she returned, Maier infused her work with all she had learned in Finland, and this year, she was named the Student Teacher of the Year for all of Ohio.

In the 2013-14 academic year, OWU awarded $169,000 in Theory-to-Practice Grants, and since the program was launched in fall 2009, it has enabled more than 500 OWU students and faculty to conduct research or complete special projects in 55 countries and 22 U.S. states.

More confirmation that Theory-to-Practice is working came this spring when three Ohio Wesleyan students and recent graduates received highly-competitive fellowships from the National Science Foundation. Each of these students had completed Theory-to-Practice experiences.

Mary Ann Lee ’14 studied vocalizations of pilot whales with 1991 OWU alumnus Douglas Nowacek, Ph.D., of the Duke University Marine Lab, and she completed an internship at the Woods Hole Oceanographic Institution in Massachusetts. She will now be attending Arizona State University to pursue a Ph.D. in animal behavior.

Brad Turnwald ’13 received a Theory-to-Practice grant to complete a summer internship at European Molecular Biology Laboratories in Heidelberg, Germany. There, he conducted research in the field of nonsense-mediated mRNA decay, expanding work completed on the OWU campus with associate professor of zoology David Markwardt, Ph.D. He is now enrolled in Stanford University’s biomedical science doctoral program.

Kristen Leer ’11 also received a Theory-to-Practice grant and spent two summers researching evening bats in Texas to determine the style of house that attracted the most bats to live near the region’s pecan orchards. She is now pursuing a Ph.D. in Integrative Conservation at the University of Georgia.

continued on page 6
Career Connections
Students can also receive grants for research projects, internships, and other practical experiences that connect their OWU education to the world they will be working in after graduation. Students can coalesce four years of learning in these Student Individualized Projects, which normally extend through at least a semester or summer.

Through one such project this past spring, three zoology students (Katelyn Nance ’14, Jonathan Overstreet ’15, Ted Shipetalo ’14) worked under the guidance of professor of zoology Amy Downing on a project they designed associated with the use of horseshoe crabs in the pharmaceutical industry. She suggested that they do collaborative research, decide on a research topic, and write a proposal for funding. They received $1,200 and set up a large experiment with 36 horseshoe crabs in the zoology department.

These students knew about the increased mortality rate of horseshoe crabs on the eastern seaboard, and their research focused on the potential link between changing ocean conditions and blood harvesting that is done on them by the biomedical industry, to acquire an important compound. Downing has nothing but praise for their resilience and professionalism throughout the project.

“I was there to guide their research, and to suggest further reading pertinent to their research,” says Downing. “The troubleshooting skills they learned and their persistence will be helpful tools for the future.”

A Distinct Advantage
The OWU Connection defines the approach that distinguishes Ohio Wesleyan from other colleges and universities. With its full array of initiatives, The OWU Connection provides a unique advantage for attracting students who want the deep learning of a traditional liberal arts education and need the experience of real-world problem solving.

More important, the program gives OWU graduates a distinct advantage in the workplace and in graduate school, where they’ll be addressing complex, multidisciplinary issues.

The success rate of recent graduates provides evidence for the strength of The OWU Connection. In a survey of 2013 graduates, 94 percent were employed or in graduate school six months after graduation. Of those employed, 85 percent were working in the field of their choice.

Furthermore, three recent OWU graduates received prestigious National Science Foundation fellowships this year, and one received a Boren Award for International Study. All four of these students had participated in elements of The OWU Connection.

President Jones sums it up: “I’m grateful for the innovative work of our faculty in developing the OWU Connection, and it’s equally rewarding to see students embrace these opportunities in ways that enrich their OWU education and help prepare them for moral leadership in a global society.”

—Will Kopp is Chief Communications Officer
The “stars” of a recently completed Student Individualized Project were 18 of the oldest living ocean fossils—horseshoe crabs, marine arthropods from the family Lamulidae—and three Ohio Wesleyan student researchers—Ted Shipitalo ’14, Jonathan Overstreet ’15, and Katelyn Nance ’14. The students, all zoology majors, approached OWU professor of zoology Amy Downing last fall, in hopes of doing individual research projects with her.

“I suggested they collaborate on a project together,” says Downing. And that’s exactly what they did, selecting their research topic and writing their proposal, which they submitted for funding—a common occurrence at most graduate schools. The students received a green light to proceed with their research, along with $1,200 to buy supplies for the project. The title of their research project, “Effects of Increased pH on Horseshoe Crab Bleeding,” encompassed the students’ investigations of the potential links between changing ocean conditions, blood harvesting that is done on these animals by the biomedical industry to attain an important compound—Limulus Amoebocyte Lysate—and the increasing decline in the number of horseshoe crabs on the eastern seaboard.

The students decided on each of their responsibilities, which included feeding and caring for the crabs, dividing them into control and experimental groups, bleeding them, weighing them, and carefully maintaining the proper pH levels in each of their containers. Part of the key to their success had to do with matching future career interests with the needed research methodology. Nance, for example, had worked at the Columbus Zoo, and knew how to take care of the horseshoe crabs. Her interest in marine biology helped with her hands-on care of the crabs. Overstreet’s interest in medical school inspired his curiosity about each test they performed and blood cell counting that revealed potential reduction of immune cells in the crabs. Shipitalo, who has a combined interest in marine life and conservation, designed the experiment to simulate how horseshoe crabs would respond to changing ocean pH, which required meticulous monitoring and maintenance of the pH and salinity levels of the water in each tank.

Also working with the students, zoology professor Dave Markwardt, observed the important interdisciplinary nature of their work, and each student’s growth in performing “real scientific research,” when things often can go awry.

“They worked really well together,” says Downing, who emphasized how persistent the students were with the inherent ups and downs of science research. “This was their idea, and they never gave up.”

Read more about this research at magazine.owu.edu/summer 2014.

Leaders, Scholars, Community Builders…
Golden Bishops Set the Standard

Each spring, for the past 27 years, OWU students, staff members, and campus organizations have been nominated and selected to receive Golden Bishop Awards for their extraordinary leadership, academic accomplishments, and service contributions. This year, 25 Golden Bishops were recognized during a ceremony April 12, as family members and friends applauded and smiles and hugs filled the Benes Rooms of the Hamilton-Williams Campus Center with joy.

Awardees represented student government, community service, student involvement, athletics, and the culminating Meek Leadership presentations.

Read more about the winners at involve.owu.edu/goldenbishops.
When Ohio Wesleyan senior Tucker Fontella first visited the Umbra Institute in Perugia, Italy, in 2013 as part of Professor Chris Fink’s travel-learning/qualitative research course, the health and human kinetics major from Stafford Springs, Connecticut, had his future career plans clearly in mind. At the institute, students learned about food traditions and aspects of food culture that are typical to that region, explains Fink. But for Fontella, those eye-opening experiences inspired him to complete a semester study abroad program in food studies at Umbra during this past spring.

From his classes at the institute, he gained insight into Italy’s history and strong culture surrounding food. He attended one of the largest international wine conventions, VinItaly. Fontella’s studies also involved food sustainability matters.

“Continuing a project begun by past students, we focused on promoting the use of take-home boxes to restaurants in the area, as most do not offer that option,” explains Fontella. The result is food waste. A lot of it. He and his fellow students found a company that makes biodegradable take-home boxes and distributed them to three area restaurants, while creating a website, social media outlets, and a promotional video for their project. The results were encouraging, as additional restaurants wanted to get involved. Says Fontella, “This has been such a life-changing experience for me. I have realized how much I want to work in the food industry. Studying the different aspects of food in a country with such a strong connection to it has been amazing.”

Read more about Tucker and the competitive internship he secured with Goretti Wines in Perugia at magazine.owu.edu/summer 2014.
Helping Wild Horses

They’re afraid of humans—and rightfully so. They have been beaten, neglected, abused, and often euthanized during horrific roundups in places such as Nevada and Arizona. And silently, they endure that which no living creature should experience.

“If These Horses Could Speak” was one of OWU’s nine mission team trips this past year, this one offering students and staff members an opportunity to work with abused wild horses and learn to communicate with them. The 11-member group traveled to Mims, Florida, during spring break to the Wild Horse Rescue Center, a nonprofit organization that rescues, rehabilitates, and finds new homes for abused mustangs. For Alesha Showman ’16 and her teammates, the trip was about learning to act as a team, as they bonded with horses and went about daily chores. Says Showman, “We needed to ‘gentle’ our horses and get them to trust humans.” Staying in cabins at the Local KOA campground, the students, many of them freshmen, got a taste of their first spring break, OWU-style. They and two members of OWU’s economics department, secretary Lisa Garvin, and business law professor Sue Ann Reulbach, learned about clicker training as a way to touch a wild mustang. The group watched as a veterinarian sedated a horse to trim its hooves—routine maintenance needed because of Florida’s soil.

“Near the end of our week there, we had an opportunity to ride the mustangs that had been gentled and trained,” says Garvin. In seven days’ time, a new world of hope and kindness embraced these beautiful creatures so deservedly.

Visit www.wildhorserescuecenter.org for more information about helping abused and neglected wild mustangs.

Hope in Haiti

As alumnae Kelsey Ullom ’14 and Rachel Vinciguerra ’14 are beginning their year-long volunteer work for Project Espwa orphanage in Les Cayes, Haiti, this summer, they thank, in part, their earlier mission team trip and Theory-to-Practice Grant experiences. Vinciguerra recalls her time spent in Haiti during spring break last May saying, “I made a commitment to myself to stay involved with the organization.”

Founded in 1998, Espwa houses, feeds, and educates about 500 children, and an additional 200 come to the complex from nearby villages for school. Alumnus Doug Dittrick ’55 has been instrumental in the operation of the facility; in 2010, the HaitiOWU Initiative was created.

As in previous years, the 2014 Hope in Haiti mission team trip called on students to help with construction, classroom assistance, sustainability issues and projects, and of course, playing with the children. For Lisa Jackson, assistant to the president, the opportunity to be on a team working with children was important.

“I traveled with an outstanding group of OWU students to the orphanage as a staff advisor,” says Jackson, who has been part of several similar trips in past years. “Each one has been very different, but one thing that is the same is that you come home a changed person. I’ve learned that mission work does not end when you return; it stays with you forever.”
Dental Office on Wheels

A recent edition of the *Journal of Dental Research* reported that an astounding 3.9 billion people living in mostly underdeveloped countries of the world, suffer from major untreated dental problems. OWU alumnus Dr. David Paul ’85, a dentist and associate professor in diagnosis and health promotion at Tufts University, his students, and a number of colleagues are doing something even more than they have in the past about that—using their knowledge, skills, and a soon-to-be renovated 42-foot recreational vehicle (RV). The plan is for this future fully functional, two-chair dental office on wheels to reach out to patients in the Dominican Republic and offer the dental care they so badly need.

“We raised $65,000 for this project, with funds being matched by the Nashoba Valley Rotary Club,” says Paul, explaining that the project is part of the “We Are One” joint project of the club as well as the Rotary Club of Santo Domingo Innovador and others. Paul, no stranger to this kind of outreach work, estimates that he has led 15 dental mission trips with more than 150 Tufts students over the years. He became involved with the mobile clinic effort through Richard Simon, vice president of the Nashoba Rotary Club and one of Paul’s patients.

“Some of the biggest challenges involve working in poor facilities and with substandard resources,” says Paul, who must strive for high quality of care as he and his team members do fillings, cleanings, extractions, and other procedures. Toothpaste, brushes, and clean water can do wonders for the widespread cases of pediatric tooth decay he sees, and with each visit by his team, there are brushes and toothpaste aplenty to hand out.

As the mobile clinic is completed some time this summer, Paul and his students will continue to treat patients at their home base in Santo Domingo Norte, and work alongside Dr. Frantz Compere, founder and executive director of Clinica Sodhaidesa, who has organized similar humanitarian efforts in the Dominican Republic and Haiti. The practical experience gained by his students is invaluable, and their service for those in need, is precious.

“I did my residency at Boston City Hospital, where I cared for very poor people, many of them AIDS patients,” says Paul, adding that Tuft’s dental clinic is the second largest in the country. “I enjoy taking care of those who need it the most.”
Bishops Forever

REFLECTIONS OF A FIRST-TIME ALUMNI WEEKEND ATTENDEE (CLASS OF 2009)

Talking about writing with my favorite professor over a beer at the Backstretch. Waking up in a dorm room that I share with my best friend on a Saturday morning. Walking down the JAYwalk, waving to friends and laughing. In so many ways, being on campus over Alumni Weekend for my fifth reunion felt exactly like it did five years ago. Yet, in so many ways, everything was different. Campus was different, of course, with beautifully renovated buildings, a lovely fountain on the JAYwalk, and a few new faces here and there. And we were different—no longer 22, but adults with jobs and graduate degrees and real-life responsibilities.

While it was bittersweet to see changes in OWU and in ourselves, it was also a source of comfort. That’s the thing about coming home, after all. Home is the place that knows who you were, houses your memories, but always welcomes the person you’ve become. That’s what OWU does as a campus—but more importantly, that’s what OWU does as a community. Coming home to OWU this May was a time for us to relive old memories and be grateful for them—but it was also a chance to create new ones, and continue the journey of what it means to be an Ohio Wesleyan graduate: laughing, learning, and growing with amazing people.

At Sunday morning brunch that weekend, my friends and I wondered aloud just what it is that makes OWU so incredibly special to us. “The thing about OWU,” my friend said, “is that since we came here, nothing has ever been the same. OWU is a part of everything that has happened to us since, and everything that’s going to happen to us in the future.”

We’re different people now, but Ohio Wesleyan is at the heart of our identities. We’ll be a lot of things in our lives, but we’ll always be Bishops.

—Amanda Zechiel ’09
“(My) time here ... made me become the person I am today in so many ways, and that’s why it was important for me to share this experience with my husband, bring him over from Bolivia and show him around campus, and let him experience a little bit of those four years that were so important for me,” Claudia Patricia Gamboa de Kattan ’99

“We danced at the freshman mixer our senior year,” Marjorie Butler Burkhart ’54

“And that’s when it really started,” Cecil ‘Cy’ Burkhart ’54

(The Burkharts are walking directly behind the banner in the top center photo.)
John and Kathie Bradford Milligan, both members of the OWU Class of 1983, are strong—and generous—supporters of the OWU liberal arts education.

During Alumni Weekend, the Milligans gifted Ohio Wesleyan with $5 million to create “The John and Kathryn Bradford Milligan ’83/’83 Endowed Fund for The OWU Connection.” Their contribution marks the lead gift for the upcoming capital campaign.

“The education I received at Ohio Wesleyan gave me a solid base in the liberal arts,” said Kathie, whose career path has included serving as a national spokesperson for the Federal Bureau of Investigation. “But OWU gave me so much more than an education. I was able to form relationships with peers and professors that helped me to move confidently forward in my career and in life. John and I are fortunate to count many of our closest friends as OWU graduates. We are confident that the same will be true for our son [Bradford ’15].”

John echoed his wife’s comments—and recently was selected to discuss his OWU education as part of a national initiative by the Washington, D.C.-based Council of Independent Colleges. For the project, John discussed how his life as a scientist was affected by an OWU humanities class. The course explored moral decisions in public and private settings and included reading “The Plague,” which examines an outbreak of the bubonic plague.

“The in-class discussions of the behaviors and motivations of people under tremendous duress fascinated me,” John said. “The prospect of a deadly disease wiping out a society horrified me. Ironically, the year I read ‘The Plague’ was the same year that an unknown and deadly infectious disease was first described in scientific literature. Within a few years, America was experiencing its own plague as HIV/AIDS took hold.

“After I received my Ph.D., and at the height of the epidemic, I joined a small company that was directing its efforts to finding ways to combat HIV,” John continued. “Through hard work and persistence, our team was able to create a new medicine that was able to control the virus. …

“Did one book discussed in one course make all this happen for me? Not literally, of course,” he told the CIC. “However, the book and discussions stuck with me for many years and influenced my choices. I saw the world differently as a result of what I had learned in the classroom and made choices accordingly. … I have my liberal arts education and many professors to thank for preparing me to move out of my comfort zone, tackle new challenges, and succeed.”

—Cole Hatcher is Director of Media and Community Relations
CALENDAR OF EVENTS

The following is a listing of OWU alumni events around the country. These events offer alumni, families, and friends opportunities to network with fellow Bishops and to reconnect with OWU near your hometown. To RSVP for an event, please visit http://community.owu.edu/events or call (740) 368-3325.

If you are interested in coordinating an event in your city, contact the Alumni Relations Office at (740) 368-3325 or e-mail alumni@owu.edu

JULY
July 12 – Frankfort, MI
OWU Barbeque at Stratton Hill Cherry Farm

July 12 – Cleveland, OH
Young Alumni Habitat for Humanity Service Day

July 22 – Cincinnati, OH
Annual Summer Send-Off Picnic

July 25 – Denver, CO
OWU Night at the Rockies

AUGUST
August 3 – Cleveland, OH
Summer on the Cuyahoga Reception

August 29 – Cincinnati, OH
Shakespeare in the Park

SEPTEMBER
September 5 – Cleveland, OH
Young Alumni “First Friday” at the Cleveland Museum of Art

September 5 – Washington, D.C.
OWU Night at the Nationals

September 9 – Columbus, OH
Central Ohio Breakfast Series at the Athletic Club of Columbus

September 12 – Sunbury, OH
11th Annual Team OWU and Alumni “W” Association Golf Outing

September 18 – New York, NY
Young Alumni Happy Hour

September 19-21 – OWU Campus
Family Weekend 2014

September 23 – OWU Campus
Columbus Monnett Club

September 29 – Morristown, NJ
OWU Golf Outing

OCTOBER
October 5 – Charlotte, NC
At the home of Bob ‘73 and Chris Campbell ‘73 Walters

October 6-14 – Various Cities
Bishops in Service Week

October 18 – Boston
Head of the Charles

October 18 – Far Hills, NJ
The Hunt

October 24-26 – On-Campus
Homecoming Weekend 2014 – Including the 25th Anniversary of Delta Zeta and the OWU Athletic Hall of Fame

DECEMBER
December 2 – Boston, MA
Holiday Event

December 3 – Philadelphia, PA
Holiday Event

December 4 – Chicago, IL
Holiday Event

December 4 – New York, NY
Holiday Event

December 7 – San Francisco, CA

December 9 – Columbus, OH
Holiday Event

December 10 – Cleveland, OH
Holiday Event

December 11 – Washington, D.C.
Holiday Event

December 16 – Columbus, OH
Central Breakfast Series at the Athletic Club of Columbus

On June 1, D.C. alumni enjoyed a picnic at the home of Sharon Smithey Coale ’72.
1930s
Ivan A. Hall '39 was featured in the Cumberland Times-News as the only surviving charter member of the LaVale, Maryland Lions Club. Ivan helped to start the club in 1955.

1950s
Dave Puddington '50 and Jean Hinton Puddington '51 are pleased to announce the adoption of their granddaughter, Shannon, whom they raised as a daughter since she was four years old in 1989.

Jean E. Carper ’53 was inducted into the Ohio Foundation of Independent Colleges (OFIC) Hall of Excellence in April 2014. Carper is the New York Times best-selling author of 24 books on health and nutrition. The Hall of Excellence honors outstanding alumni from OFIC-member colleges.

Craig Dean Willis ’57, president emeritus of Lock Haven University, was honored by the university where he taught for 22 years when they named their health professions building the Willis Health Professions Center in summer of 2013.

1960s
Evan Bukey ’62 was awarded the Karl von Vogelsang State Prize for the History of Social Sciences by the Austrian government on April 25, 2014 in Vienna. Evan is professor emeritus of history at the University of Arkansas. An international jury of renowned scholars in intellectual, social, and political history gave the award to recognize Evan’s significant contributions to historical scholarship.

William G. Batchelder III ’64 gave the commencement address at Ashland University on May 10, 2014. William is the Speaker of the Ohio House of Representatives.

George T. Bowden ’67, a professor emeritus of cellular and molecular medicine, molecular and cellular biology, pharmacology and toxicology, and radiation oncology at the University of Arizona, recently announced a significant planned estate gift to benefit the cancer biology graduate interdisciplinary program at the University of Arizona Cancer Center. The gift will also support Parkinson’s disease research in the department of neurology at the University of Arizona College of Medicine.

1970s
Brian Nolan ’70 retired from teaching in 2010 having spent 40 years in education, the last 30 at Benedictine High School in Cleveland. There he taught British literature, grammar, and composition. Brian coached football (5 OHSAA state championship games, 4 titles), wrestling, and baseball during his teaching career at Benedictine, having served as head varsity coach in both wrestling and baseball and defensive coordinator in football. Since 2010 he has served as varsity assistant coach in baseball at Lakewood High School (2011-2013), varsity assistant football coach at Bay Village High School (2011), and varsity defensive coordinator at Lakewood (2013). In 2013, Brian

Aikido for women
Barbara Frentsos Butler ’47 recently published “Aikido For Women: The Underlying Principles Of Why Women Have The Advantage,” a book about the soft form of this self-defense martial arts practice. Barbara was 72 years when she received her black belt in Aikido, and she taught it until last year when she was at 89.

After Barbara’s husband died, she was looking for something to occupy her mind and exercise her body. “In 1975, I went to an educational conference in Kansas City called ‘Awakening to Learn!’ There, for the first time, I learned about Aikido and the unbendable arm. I was amazed, and it eventually changed my whole life.”

Barbara says she had always wanted to write a book about Aikido. “So, when I finished teaching, I finally did it! I consider this to be handbook on what Aikido can do for women, the basics of Aikido, and its underlying principles,” she explains.

The book is dedicated to all the abused women of the world, Barbara points out. She hopes that through Aikido, they can be better prepared to defend themselves, regardless of their age or size.
was elected to the Greater Cleveland Softball Hall of Fame. He began playing competitive softball following graduation from OWU and still competes at the national level in senior softball (55 years and older, 60 and older, and 65 and older age divisions). In 2013 he was voted to the 60 and over all-tournament team at the Winter Nationals in Ft. Myers, FL., leading his age division in home runs. He also competed in the Senior Olympics in 2013 in Cleveland, his team winning a bronze medal in the 60 and over AAA division after passing on an opportunity to rebuild homes damaged by Hurricane Katrina.

Barbara J. von der Heydt ’72
Elliot spoke at Northwood University’s Forum for Citizenship & Enterprise on February 5, 2014. Barbara is the founder of the Center for Cultural Renewal, a resource center for faith-based organizations working to renew the cities of America, and the WorkFaith Connection. ### Lecturing at the Library of Congress

Koritha Mitchell ’96, associate professor of English at The Ohio State University, gave a lecture at the Library of Congress on March 14, 2014. She spoke about her award-winning book “Living with Lynching: African American Lynching Plays, Performance, and Citizenship, 1890-1930.” Koritha’s book tells the story of black authors who wrote plays about lynching in the 1910s and 1920s and provided their communities with scripts that affirmed their self-conceptions and encouraged them to mourn their losses.

A literary historian and cultural critic, Koritha focuses her research on African-American literature, racial violence in U.S. literature and contemporary culture, and black drama and performance.

During her lecture at the Library of Congress, Koritha discussed the book and offered a book signing. The lecture aired on C-Span’s BookTV and is archived for online viewing. After the lecture, Koritha was presented with a Certificate of Congressional Recognition.

Leonard L. Chappel ’89 recently joined the University of Akron’s men’s soccer coaching staff in Akron, Ohio. Leonard has nearly 20 years of collegiate coaching experience, and he most recently served as director of scouting for Toronto FC of Major League Soccer.

1961
David Clark Grout, of Fort Atkinson, Wisconsin, died on February 24, 2014, at the age of 74. David was preceded in death by his wife, Linda Lowry Grout ’62. He was a member of Phi Gamma Delta fraternity.

Lynda M. Wood Hartman, of Canandaigua, New York, died on March 31, 2014, at the age of 75. She was a member of Gamma Phi Beta sorority.

Robert D. Nelson, of Manchester, New Hampshire, died on March 29, 2014, at the age of 76. He was preceded in death by a brother, James C. Nelson ’61, and he is survived by a brother, William D. Nelson ’60. Robert was a member of Delta Tau Delta fraternity.

1965
James W. Schultz, of Port Charlotte, Florida, died on March 20, 2014, at the age of 71. He is survived by his wife, Anne A. Mallard Schultz ’66, and a daughter, Amy A. Commins ’00. He was a member of Delta Tau Delta fraternity.

1966
William M. Stanton, of Potomac, Maryland, died on April 5, 2014. He is survived by his wife, Jane P. Neff Stanton ’66, and two nieces, Kelly Neff Shoffstall ’09 and Carolyn D. Tjayor ’03. He was a member of Phi Kappa Psi fraternity.

1967
John M. Patton, of Powell, Ohio, died on March 9, 2014, at the age of 68. He was preceded in death by father, Richard Patton ’36, and is survived by his mother, Sarah Spencer Patton ’36. He was a member of Delta Tau Delta.

1968
June Woodbury Karassik, of Ellicottville, New York, died on March 5, 2014, at the age of 67. She is survived by her husband, John I. Karassik ’68, and she was a member of Alpha Chi Omega sorority.

1972
Harry F. Radcliffe, of Uniontown, Pennsylvania, died on February 27, 2014, at the age of 63. He was a member of Sigma Chi fraternity.

1976
Michael T. Benoit, of Plano, Texas, died on April 15, 2014, at the age of 60. He was a member of Phi Gamma Delta.

Gloria McDuffie, of Plantation, Florida, died on March 16, 2014, at the age of 60.

1986
Lucinda M. Kitzman, of Winnetka, Illinois, died on February 23, 2014, at the age of 50. She was a member of Delta Delta Delta sorority.

Faculty/Staff
Dr. William F. Quillian, former Ohio Wesleyan professor of philosophy, died on March 4, 2014, at the age of 100. William was awarded an honorary Ohio Wesleyan degree in 1952.

Friends
Eunice Hill Waber, of Delaware, Ohio, died on March 10, 2014, at the age of 88. Eunice is survived by three children, Loyann Waber Brush ’80, Elise Hays ’82, and Renee Waber Caserta ’85, and a granddaughter, Rebecca Caserta ’15.

Sympathy to
Sally Eliot Williams ’48 for the death of her husband, Donald Herbert Williams, who died on July 17, 2013, at the age of 87. Sympathy is also extended to Donald’s children, Susan Williams Bauer ’74, Judy Williams Henning ’77, and Steven Eliot Williams ’83, and his grandchildren, Jessica Jean Bauer ’03 and Claudia Elizabeth Henning ’11.

Kathryn “Kathi” L. Tighe ’73 for the loss of her mother, Margaret S. Hoar, on October 13, 2013.

Kathryn Shepherd Strang ’77 for the loss of her mother, Elsie Shepherd, in Denver, Colorado on March 27, 2014.

Abigail Adams ’78 and Samuel Adams ’82 for the loss of their mother, Anne Hopkins Adams of Owls Head, Maine. She died on March 20, 2014, at the age of 84.

Doreen Maddox Canning ’81 for the death of her mother on March 31, 2014.

Carol Doubikin ’99, a retired secretary in the OWU history department, for the loss of her mother, Ann Florence Gregory, on February 26, 2014 in Delaware, Ohio. Also mourning the loss are Carol’s children, Gregory A. Doubikin ’90 and John E. Doubikin ’89, and Carol’s grandson, Joshua T. Rodman ’99.

Brandy N. Booth ’15 for the loss of her father, John C. Booth, who died on March 28, 2014, at the age of 52. John lived in Butler, Ohio.
An Artful Teacher

Title:
“Wilson’s Warbler: Field Sketch”

Medium:
Digital Art

Artist:
Kate Ball ’10

“This April, I attended the Wilson Symposium at OWU, organized by zoology professor Jed Burtt. Alexander Wilson (1766-1813), the conference’s namesake, published a nine-volume bird guide during his lifetime and was an accomplished writer, naturalist, artist, and weaver. Wilson’s work and the conference exemplified the liberal arts. With this piece, a “field sketch” of the symposium, I wanted to illustrate the interdisciplinary connections I see between Wilson’s biography, OWU, and liberal arts studies.”
Board of Trustees at Ohio Wesleyan University

Officers of the Board
Thomas R. Tritton '69, Chairperson
John Milligan '83, Chairperson
Dan Mitchell, Treasurer
Lisa D. Jackson, Secretary
Brenna B. Morse, Assistant Secretary

Ex-Officio
John Hopkins, Bishop, Ohio East Conference of the United Methodist Church, North Canton, Ohio
Bishop Gregory V. Palmer, Bishop, Ohio West Conference of the United Methodist Church, Worthington, Ohio
