Ohio Wesleyan University

Student Health Services

Required Information
All new students are required to provide medical and immunization information online before coming to campus. Please visit owu.edu/health for a checklist and further details.

All students must submit an official immunization record by mail, fax, or email to the Student Health Center before coming to campus.

Care Available
Student Health Services, located in the lower level of Stuyvesant Hall on the residential side of campus, is operated by OhioHealth and is available to all OWU students. The Health Center does not provide care during vacation periods. Services offered include, but are not limited to:

- Physical examinations
- Illness/injury care and follow-up
- Gynecological exams
- STD/HIV testing
- Health promotion counseling
- Coordination of care with primary care physicians and specialists
- Immunizations/Allergy injections
- Chronic illness support
- Medicine management for limited mental health concerns—depression, anxiety, sleep disorders, ADD

Insurance
All students are required to have health insurance. OhioHealth will bill insurance directly for all services. When coming to the center for care, students should always bring:

- Medical insurance card
- Student ID or legal ID
- Credit/debit card or check for co-payment

The following link will take you to our website to view the plans with which OhioHealth hospitals and professionals contract with: https://www.ohiohealth.com/insurance/. The plans accepted at OWU Student Health can be accessed by scrolling to the Physicians section and selecting OhioHealth Corp (WorkHealth). We encourage you to access this site to determine if the OhioHealth facilities and providers will be in-network with your insurance.

If OhioHealth is out-of-network or a student needs to purchase insurance, the University makes available to students an insurance plan in which claims are administered through Commercial Travelers Mutual Insurance Co. For more information, visit http://www.studentplanscenter.com.

Missing Class / Assignments
Written excuses are not issued by Student Health Services. Students who are ill and miss classes are responsible for notifying professors about missed time/assignments. If a student has an extended illness or is hospitalized and will miss more than 3 consecutive days of classes, Student Health Services can assist with sending an “Out-of-Class Notice” after medical documentation is received from the student’s healthcare provider. Student Health Services cannot
excuse missed work or tests.

Student Health Services
