

What to do *when someone at work gets hurt.*

IN EMERGENCY SITUATIONS:

- ✓ Seek treatment immediately at the nearest medical facility.

IN NON-EMERGENCY SITUATIONS:

- ✓ Immediately notify your supervisor or designated person.
- ✓ Be sure to get a ProMedica Medical Management ID card.
- ✓ Seek treatment from the nearest medical facility. If you need help, your employer may assist you.
- ✓ Notify the treating provider that you have a work-related injury and all medical information should be sent to ProMedica Medical Management within 24 hours of treatment.
- ✓ Select a physician of record to provide any ongoing medical care you may need.
- ✓ ProMedica Medical Management will stay in contact with you, your employer, and the treating physician until you are released to work, or you have reached maximum medical improvement from your injury.

According to Health Partnership Program guidelines, injured workers may seek treatment from any BWC certified medical provider.
