Exercise, Smoking, Diet
What's Your New Year Resolution?
NEW YEAR
No resolutions
No diet
No deadlines
JUST LIFE
Make Goals instead

Make them SMART goals

• S- Specific
• M- Measureable
• A- Achievable
• R- Realistic
• T- Time based
Does anyone know how many minutes of physical activity per week is recommended?
Exercise is Medicine

• How to Start
• If you want to join any of the FITOWU classes or personal/small group training:
  • 1. Complete the PAR-Q (Physical Activity Readiness Questionnaire) available on this Web site: https://www.nasm.org/docs/pdf/nasm-cpt-par-q.pdf?sfvrsn=2 to be sure you are prepared and understand the risks of exercise. Please bring a copy to your first class.
  • a. For an explanation of the PAR-Q see this site:
  • 2. As part of the Exercise is Medicine TM program, and increasing awareness of cardiovascular health, we ask that you take a moment to complete this short, yet comprehensive, Heart-Disease-Risk-Calculator:
  • https://www.mayoclinic.org/diseases-conditions/heart-disease/in-depth/heart-disease-risk/itt-20084942#

How Does Physical Activity work

• **Exercise** reduces immune system chemicals that **can** make depression worse. **Exercise** increases your level of endorphins, which are natural **mood** lifters. **Exercise** helps by getting your sleep patterns back to normal. ... **Exercise** limits the effect of stress on your brain.
Does it have to be at the gym to count?
What counts?
We have got to MOVE!!

• Do you know how many hours the average American sits per day?
My SMART GOAL

• Specific- I’m going to be physically active for 30 minutes each day
• Measurable- I will start with the 100 day challenge and then move onto lift 4 on BOD.
• Achievable- I can achieve this if I get up at 5:00am and do my workout
• Realistic- I need to workout in the am so I don’t make excuses to not workout and achieve my goal
• Time Based- I will track my progress on my planner and reach success of at least 180 minutes of activity per week.
Wellness Wheel

- Physical
- Intellectual
- Emotional
- Occupational
- Social
- Spiritual
- Financial
- Environmental
Emotional wellness inspires self-care, relaxation, stress reduction and the development of inner strength. It is important to be attentive to both positive and negative feelings and be able to understand how to handle these emotions. ... It is an important part of overall wellness.
Emotional Intelligence

What is it?????
An emotionally intelligent individual is both highly conscious of his or her own emotional states, even negativity—frustration, sadness, or something more subtle—and able to identify and manage them. These people are also especially tuned in to the emotions others experience. It’s easy to see how a sensitivity to emotional signals from within and from the social environment could make one a better friend, parent, leader, or romantic partner. Fortunately, these skills can be honed.
Our Brains are wired so our first reaction is ALWAYS going to be an emotional one.
You have NO control over that part of the process, but you DO control the thoughts that follow and your emotions. You have a great deal of say in how you react to that emotion.
Dave

• Dave is a regional service manager
• Self-Awareness score of 95

• “In short, Dave manages his emotions; they don’t manage him. I’ve seen him accept difficult business news with a brief frown, and then quickly moves beyond that and partners with his team to find solutions to improve the situation.”
Giles

• Giles is an operations director
• Self-Awareness score of 67

• “Giles is passionate about what he does. Sometimes that passion gets in the way. He might not notice that I am busy with something else before he jumps in and starts talking to me. When he is excited, he talks over you, and it’s hard to get a work in edgewise. He doesn’t mean to; he just is excited about what he does.”
How do we become like Dave?

1. Seek feedback
   • How do others experience you?

2. Lean into your discomfort
   • Rather than avoiding a feeling, your goal should be to move toward the emotion, into it, and eventually through it.

3. Know who and what pushes your buttons
   • Understanding what pushes your buttons allows you to be prepare or less “caught off guard” when this person or situation is around. Why do you have these buttons?
Straw Breathing

- Inhale normally and naturally.
- Exhale fully through a plastic drinking straw - make sure you have exhaled all of the air out of your lungs.
- Inhale normally (not through the straw).
- Exhale fully out of the straw.
- Repeat this exercise for 5 minutes.
- Ideally, do this twice a day.
Go for a walk
Confidential Counseling

3 Session Plan

This no-cost counseling service helps you address stress, relationship and other personal issues you and your family may face. It is staffed by Guidance Consultants℠—highly trained master’s and doctoral level clinicians who will listen to your concerns and quickly refer you to in-person counseling (up to 3 sessions per issue per year) and other resources for:

- Stress, anxiety and depression
- Relationship/marital conflicts
- Problems with children
- Job pressures
- Grief and loss
- Substance abuse
Occupational well-being involves the ability to achieve a healthy work-life balance, manage workplace stress and build relationships with bosses and coworkers while integrating the commitment to your occupation into a lifestyle that is both satisfying and rewarding. This dimension of well-being also involves actively seeking out professional development opportunities and developing functional skills that will transfer into the workplace, commonly referred to as “transferable skills.”
The New York Times: A deceptively simple way to find more happiness at work

- Tim Herrera
- Do the small individual components of our job make us happy?

- Mayo clinic study showed MDs who spend 20% of their time doing “work they find most meaningful are at dramatically lower risk for burnout.”
- Anything beyond 20% had a marginal impact

- In other words: You don’t need to change everything about your job to see substantial benefits in job satisfaction.
Week Inventory

• Carry a note pad
• Write down all of the things you do daily that you like and dislike
• How does each task make you feel (Are you excited, does time fly, or do you procrastinate and dread it)
• Figure our what really lights your fire and talk to your manager about that. Take more projects in that area.
• Give this time!
Social Wellness

• **Social wellness** refers to the relationships we have and how we interact with others. Our relationships can offer support during difficult times. **Social wellness** involves building healthy, nurturing and supportive relationships as well as fostering a genuine connection with those around you.
Social Wellness

Adults with very limited social contact show a 30 point increase in blood pressure readings.
Financial Wellness
