	Satisfaction of completers:
CAEP Assessment	Ohio Department of Higher Education
Cover Form	Survey of Ohio Pre-Service Teacher
	Candidates
Administration and Purpose	The Ohio Department of Higher Education (ODHE) assists EPPs in collecting completer data by surveying all teacher education candidates as they end their student teaching assignment. ODHE sends the raw data back to each EPP with the results from their completers. The purpose of this assessment is to gauge existing candidates' perceptions of how well they were prepared to take their place as a professional educator in the public schools in this state. This survey is delivered electronically.
Informing Candidates	Candidates are informed that this survey will be emailed to them in their student teaching semester (typically March). Candidates are given time during a student teaching seminar to complete the survey. Faculty leave the room while candidates complete the survey.
Content of Assessment	See the list of 49 items below.
	During a department meeting EPP faculty members sorted the 49 survey items into zero, one, or more InTASC categories. Each member sorted some of the items, and all faculty members checked each category for accuracy, and realigned as needed.
Scoring	Each survey item has a 4-point Likert type scale with 1 representing "strongly disagree" and 4 representing "strongly agree."
Data Validity or Survey Content	The Pre-Service Teacher Survey is found to have strong content
Data Reliability or Data Quality	validity, shown in the excel crosswalk found at this link <u>Ohio</u> <u>Educator Surveys Crosswalk With Ohio Standards</u> aligning the survey to the Ohio Standards for the Teaching Profession (InTASC aligned), the Ohio School Operating Standards, and the Ohio Standards for Professional Development. A linear regression model applied found a strong linear relationship between the Pre-Service Teacher Survey and the Resident Educator Survey completers fill out in their second year of their Resident Educator license, indicating that that Pre-Service Teacher survey is a strong predictor. More information about ODHE survey validity and reliability is found here:

Comments	In general, the data in the table indicate that across all areas, our graduates are in agreement that they are well-prepared to go and teach in their own classrooms.
	This year our response rate returned to pre-pandemic levels with an 83.33% response rate from our preservice teachers. During the pandemic years, our response rate had fallen well below previous levels (e.g., 2020-2021 38.89%). Anecdotally, our faculty noted the exhaustion and apathy present in our preservice candidates at the time they were asked to complete this survey during the pandemic. Last year, emphasis was placed on the importance of completing this survey and the 83.33% response rate indicates that preservice candidates did take the time to submit their responses. Having more candidates complete this survey provides the EPP with additional confidence that our candidates feel well-prepared for teaching in their future classrooms.
